## experience

---

### **Software Engineer Co-op at Meiday Health, Boston, MA** | Jan. 2021 - present

- Deliver features for and debug an ER waiting room simulation based on a Python algorithm
- Develop department analytics pages for a radiology pathology dashboard using TypeScript
- Create a marketing website for Meiday Health using Tailwind CSS, Next.js, React, and Netlify

### **Web Developer and Designer at Independent Contracting, Boston, MA** | Jan. 2020 - present

- Collaborated with a sustainable fashion brand startup to design foundational branding guidelines for their product launch
- Develop responsive email and landing page templates for Wisly Marketing using HTML/CSS in their clients' Omnisend and Shopify environments

### **Developer & Designer at Scout Studio, Boston, MA** | Sept. 2019 - Dec. 2020

- Collaborated with an agile team of designers and developers to conduct research, design wireframes, and develop a website celebrating the 10 year anniversary of IDEA, a student venture accelerator
- Developed a marketing website using React, Gatsby, and Contentful CMS for Worksense, a software analytics tool that uses data-driven decisions to promote diversity and inclusion in the workplace

### **Digital Design Co-op at International Energy Agency, Paris, France** | Jan. - June 2020

- Produced interactive content and created company-wide standardized processes for developing responsive web graphics on the IEA website
- Designed charts, maps, brochures, and publication covers for use across digital and print

### **IT Web Developer Co-op at John Hancock, Boston, MA** | Jan. - June 2019

- Designed and coded a self-service portal to assist with onboarding and provide technological support for company's 1000 Boston-based employees
- Served as sole designer and developer on multi-disciplinary team
